JACC is a program that provides in-home services to seniors at risk of placement in a nursing facility. JACC includes an array of services designed to supplement the assistance given by the individual's caregiver network. Qualified individuals may have the opportunity to hire their own eligible family, friends, or neighbors to provide the care they need.

By designing service plans uniquely tailored to the individual, JACC works to enhance the individual's community care options. JACC also strengthens the ability of caregivers to continue in their vital role as primary support providers.

Please visit the website of the New Jersey Department of Health and Senior Services, Division of Aging & Community Services, www.state.nj.us/health, for more information about **JACC** and other home and community-based alternatives for persons seeking long-term care.
